John Payne is one of Australia's foremost conservators and authorities on the development of mouldings and frames used in picture framing from their inception in Europe in 1500 until the present day. John was the guest speaker at the PFGA's 2011 Annual Conference. His presentation on that occasion was most informative and extremely well received.

John Payne has written many articles on Picture Framing including his highly accredited book, "Framing the Nineteenth Century: Picture Frames, 1837-1935".

This evening promises to be a wonderful opportunity to be informed, discuss your opinions and network with Picture Framers.
